

cTMed: Continuous-Time Mediation

Ivan Jacob Agaloos Pesigan

Description

Implements the methods introduced in Pesigan et al. (2025) to compute standard errors, confidence intervals, and effect sizes for total, direct, and indirect effects in continuous-time mediation models.

Installation

You can install the development version of `cTMed` from [GitHub](#) with:

```
if (!require("remotes")) install.packages("remotes")
remotes::install_github("jeksterslab/cTMed")
```

More Information

See [GitHub Pages](#) for package documentation.
