

cTMed: Continuous-Time Mediation

Ivan Jacob Agaloos Pesigan

Description

Computes effect sizes, standard errors, and confidence intervals for total, direct, and indirect effects in continuous-time mediation models as described in Pesigan et al. (2025).

Author-Accepted Manuscript

See <https://github.com/jeksterslab/manCTMed/blob/main/.setup/latex/manCTMed-manuscript.Rtex> for the latex file of the manuscript. See <https://github.com/jeksterslab/manCTMed/blob/main/latex/manCTMed-manuscript.pdf> for the compiled PDF.

Installation

You can install the CRAN release of ‘cTMed’ with:

```
install.packages("cTMed")
```

You can install the development version of cTMed from [GitHub](#) with:

```
if (!require("pak")) install.packages("pak")
pak::pkg_install("jeksterslab/cTMed")
```

More Information

See [GitHub Pages](#) for package documentation.

Citation

To cite `cTMed` in publications, please cite Pesigan et al. (2025).
